- Leadership

## About Me

I'm a Web Developer with experience building and maintaining web applications using PHP, Laravel, MySQL, and Vue.js. I enjoy solving problems, learning new technologies, and developing systems that make daily work easier. I'm looking to improve my backend development skills and grow as a developer.

## Experience

**2025 - Present**

Dewey International Co., Ltd.

**Full Stack Web Developer**

- Develop and maintain the School Management System
- Build user interfaces using Vue.js, TypeScript, and Vuetify.
- Develop system features based on school requirements.
- Manage database integration and API communication.
- Improve school workflows through system development and automation.
- Convert the manual work to use the technology.

**January 2025 - March 2025**

Volunteering | National University of Battambang

**Full Stack Web Developer**

- Developed a Library Management System to improve library operations.
- Designed features to manage books and library records.
- Worked with university requirements to develop a practical solution.
- Built the system using Vue.js, Laravel, and MySQL.
- Helped reduce manual work through system development.

**July 2024 - November 2025**

Internship | Rabbit Technology of Battambang

**Frontend Developer**

- Learned and researched frontend development technologies.
- Practiced building user interfaces for web applications.
- Explored coding practices and frontend development tools.
- Gained experience working in a professional development environment.
